

The World Skin Health Coalition, established in May 2022, is a patient-led multi-stakeholder group that has united under a shared vision. It was founded to help address the global challenges of dermatological diseases and to elevate skin health on the global health policy agenda. Through the Coalition, we have joined forces to advocate for better access to care and treatment and increased recognition of skin health's true impact.

Our Global Partners

At the heart of the World Skin Health Coalition are our dedicated partners, encompassing three key stakeholder groups, each bringing their own skills, experience and resources to the common goal.
